BEETHEFIRST has been awarded the “Best of Plug ‘n’Play 3D Printers”

Dear 3D printing community,

We are proud to announce that our 3D printer BEETHEFIRST was considered again “Best of Plug‘n’Play Printer” in the 3D Hubs 2016 Printer guide.

This Guide, based on 5350 reviews from the 3D Hubs community, states that “for users looking for a true plug ‘n’ play 3D printer, such as educators or professionals, the BEETHEFIRST is certainly one of the best options available today.”

It also states that “the printer, which features a modern and enclosed design for carrying like a briefcase between printing locations, is considered by many to be one of the most user-friendly designs on the market (...) this is because the printer was designed to be used directly out of the box with the ability to print within minutes.”

The 3D Hubs Community also valued BEETHEFIRST’s usability, print and build quality, as well as BEEVERYCREATIVE’s helpful and responsive customer service. We pride ourselves on providing the best customer experience possible and as a result, 95% of BEETHEFIRST owners recommend our 3D printer!

It’s the second year in a row that BEETHEFIRST is one of the best in the Plug‘n’Play category, for which we thank the 3D Hubs Community and we will keep imprinting change with 3D printing!
